PROFESSIONAL SUMMARY

I am a results-driven Data Analyst with hands-on experience in Python, SQL, Power BI, and Tableau, currently pursuing an M.S. in Computer Science and Data Analytics at IIT Patna. I build ETL pipelines, clean and analyze complex data, and create KPI dashboards, with proven results of 25% faster data transformation and approximately 35% faster SQL query performance. Google Advanced Data Analytics certified, with a foundation in Machine Learning.

TECHNICAL SKILLS

Programming & Databases: Python (Pandas, NumPy, Matplotlib), SQL, MySQL, Query Optimization

BI & Visualization: Power BI, Tableau, Interactive Dashboards, KPI Reporting

Data Analytics: Exploratory Data Analysis (EDA), Data Cleaning, ETL & Data Pipelines

Machine Learning: Scikit-learn, TensorFlow (applied ML, trend forecasting)

AI & Generative AI Technologies: Prompt Engineering, Retrieval-Augmented Generation (RAG)

Tools: Git/GitHub, AWS (basics)

Also familiar with: React.js, TypeScript, Node.js, Fast API, REST APIs, Vercel, Julius.AI

WORK EXPERIENCE

Full Stack Developer Intern | Jun 2026 – Sep 2026
Graphicsporium
- Designed and developed responsive, user-friendly web interfaces for modern web applications.
- Built frontend components using React.js, TypeScript, and Tailwind CSS, and worked on backend development with Node.js.
- Collaborated with the development team to deliver project requirements, strengthening skills in full-stack development, problem-solving, and teamwork.

Data Analyst (INTERN) | Sep 2025 – Oct 2025
Vodafone Idea Limited | *Remote*
- Automated enterprise reporting and data transformation workflows using Python (Pandas/NumPy) and Power BI, reducing data transformation cycle time by 25%.
- Built interactive cross-functional executive dashboards to monitor telecom KPIs, trends, and operational performance and support data-driven decision-making.
- Cleaned, structured, and validated unstructured network telemetry data to improve data reliability and identify meaningful trends for analytical reporting.
- Applied data preparation, visualization, KPI reporting, and Business Intelligence practices to convert operational data into actionable insights.

SQL Developer (INTERN) | Feb 2025 – Apr 2025
Vaishnav Technologies | *Remote*
- Optimized complex multi-table MySQL queries, indexes, and relational schemas, improving data retrieval speed by approximately 35%.
- Developed automated SQL reporting modules and database views to support business analytics and backend operations.
- Performed database debugging, schema validation, and query execution-plan analysis in collaboration with engineering teams.
- Applied SQL query optimization and relational data management to improve the efficiency and reliability of analytical data access.

PROJECTS

Aura.AI – Full-Stack AI Stock Analytics Platform | React, TypeScript, Node.js, Fast API, Data Analytics, TensorFlow
- Engineered a financial analytics platform for processing market data and delivering AI-assisted trend forecasting.
- Integrated Fast API services and TensorFlow models with market-data APIs to process and analyze real-time financial data.

Women Safety App (SAFE CIRCLE) | Python, Power BI, Tableau, Machine Learning
- Built an AI-assisted safety application using location-based risk assessment logic to support decision-making during critical events.
- Synthesized spatial and demographic datasets and created dynamic Power BI and Tableau risk heatmaps to analyze regional safety trends.
- Applied data cleaning, exploratory analysis, data visualization, and machine-learning concepts to transform datasets into actionable insights.

Airbnb & Netflix Exploratory Data Pipelines | Python, Pandas, Matplotlib, Data Analytics
- Performed end-to-end Exploratory Data Analysis (EDA) on 10,000+ unstructured records to identify pricing trends, review distributions, and catalog dynamics.
- Built data preparation and exploratory data pipelines using Python, Pandas, and Matplotlib to transform raw records into analysis-ready datasets.

Graphicsporium Platform | React, TypeScript, Tailwind CSS, Nodemailer
- Designed and deployed a responsive production web portal with reusable React components and optimized client-side routing.
- Achieved sub-2-second initial page load times and improved cross-device user experience.

EDUCATION

Master of Science (M.S.) in Computer Science and Data Analytics | 2026 – 2028 (Pursuing)
Indian Institute of Technology (IIT) Patna

Bachelor of Technology (B.Tech.) in Computer Science and Engineering | 2022 – 2026
University of Engineering and Management | CGPA: 8.15 / 10.0

CERTIFICATIONS

• Google Advanced Data Analytics Professional Certificate – Coursera (Jan 2025 – Mar 2025)
• AWS Cloud Computing Certification – Coursera (May 2025)

ADDITIONAL INFORMATION

• Languages: English (Proficient), Hindi (Fluent), Bengali (Native)
• Core Competencies: Analytical Thinking, Problem Solving, Data-Driven Decision Making, Cross-Functional Collaboration, Agile Workflow
